Frontend Developer

Frontend Developer with 1 years of experience. Proficient in writing clean code and continuously improving skills. Proven ability to assist senior developers and contribute to website maintenance. Collaborated with construction teams for 8+ years, ensuring accurate and efficient completion of large infrastructure projects.

WORK EXPERIENCE

Momang • 10/2023 - 06/2024

Momang is developing a SaaS product to facilitate the work of consulting companies in selling their services. Consultants and account managers use Momang to create and maintain consultants' resumes, ensuring that the resumes are of high quality and edited in a structured way. A user-friendly and visually appealing website can attract more customers and enhance the company's online presence. My tasks also include troubleshooting any frontend issues and ensuring cross-browser compatibility.

Frontend Developer Intern

- My role was to assist the senior developers in creating and maintaining the user interface of the company's website.
- Implemented a spellchecking solution across the whole Momang platform.
- Improved loading times by 50% by extracting resume sharing functionality to a separate Next.js project, resulting in a more efficient user experience.

Veidekke Entreprenad • 06/2016 - Present

Concrete Worker

- Working on various construction projects and ensuring that all concrete work is completed accurately and efficiently.
- Preparing concrete mixtures, pouring and leveling concrete, and overseeing the curing process.
- Inspecting and maintaining equipment, following safety protocols, and collaborating with other team members to meet project deadlines.
